

What is claimed is:

1 1(currently amended). An arrangement for attaching hygienic articles
2 such that their height will be adjustable, comprising:

3 a wall-mounting rod that has a continuous, guiding profile for guiding a
4 slide, the guiding profile having a slot open to a front side of the wall-
5 mounting rod and open to both end faces ~~extending over a full length of the~~
6 wall-mounting rod ~~between ends, and,~~
7 at least one bracket for fastening the wall-mounting rod to a surface,
8 wherein the arrangement leaves clear ~~that part of the~~ the guiding profile used for
9 guiding the slide.

1 2(currently amended). An arrangement according to claim 1, where
2 the bracket is attachable to the wall-mounting rod in the vicinities of the end
3 faces ends.

1 3(previously presented). An arrangement according to claim 1, wherein
2 the bracket is attachable to the wall-mounting rod by one of inserting the
3 bracket into the wall-mounting rod, and latching the bracket onto the wall-
4 mounting rod.

1 4(currently amended). An arrangement according to claim 1, ~~having~~
2 plural, wherein the at least one bracket includes a plurality of at least
3 partially identically shaped said brackets.

1 5(previously presented). An arrangement according to claim 1, where
2 the at least one bracket is configured for attachment to two sections of a wall-
3 mounting rod that are to be coaxially arranged.

1 6(currently amended). An arrangement according to claim 4, 4,
2 where the brackets are configured for attachment to two sections of a
3 wall-mounting rod that are to be coaxially arranged, where the brackets
4 have at least one bracket has two attachment sections, said attachment
5 sections of the brackets being engageable with ends of the two sections
6 of the wall-mounting rod at a joint one each at least near to each of the ends,
7 one of the attachment sections of the brackets being which is configured for
8 attaching a terminating component for terminating one of the two sections of
9 the wall-mounting rod at an other end of said one of the two sections of the
10 wall mounting rod.

1 7(previously presented). An arrangement according to claim 6, where
2 the attachment section for attaching the terminating component has a device for
3 one of a form-fit and an interference-fit attachment of the terminating
4 component.

1 8(currently amended). An arrangement according to claim 6, where
2 both attachment sections of the bracket have means for guiding the sections of
3 the wall-mounting rod.

1 9(currently amended). An arrangement according to claim 6, where
2 the two attachment sections of the bracket are separated by a land.

1 10(currently amended). An arrangement according to claim 1, where
2 the wall-mounting rod has a groove forming the a guiding profile and opening
3 at the slot.

1 11(currently amended). An arrangement for attaching hygienic
2 articles such that their height will be adjustable, comprising: An
3 arrangement according to claim 10, where

4 a wall-mounting rod that has a continuous, guiding profile for
5 guiding a slide, extending over a full length of the wall-mounting rod
6 between ends,

7 at least one bracket for fastening the wall-mounting rod to a
8 surface, wherein the arrangement leaves clear that part of the guiding
9 profile used for guiding the slide,

10 wherein the guiding profile includes a groove, and further
11 comprising a lower terminating component including has an extension of the
12 groove.

1 12(previously presented). An arrangement according to claim 1, where
2 the wall-mounting rod forms a length of stock with a hollow profile and the
3 bracket engages an interior of the hollow profile.

1 13(previously presented). An arrangement according to claim 1, where
2 accessory items are attachable to the bracket.

1 14(previously presented). An arrangement according to claim 6, wherein
2 the terminating component comprises a terminating collar.

1 15(previously presented). An arrangement according to claim 9, wherein
2 the land forms a joint.

1 16(previously presented). An arrangement according to claim 10,
2 wherein the groove is on a front surface of the wall-mounting rod.

1 17(currently amended).

An arrangement for attaching

hygienic articles such that their height will be adjustable, comprising:

2 An arrangement according to claim 13,

3 **a wall-mounting rod that has a continuous, guiding profile for**
4 **guiding a slide, extending over a full length of the wall-mounting rod**
5 **between ends,**

6 **at least one bracket for fastening the wall-mounting rod to a**
7 **surface, wherein the arrangement leaves clear that part of the guiding**
8 **profile used for guiding the slide, and,**

9 wherein the accessory items are attachable to the bracket at a land
10 separating two attachment sections.

1 18(previously presented). An arrangement according to claim 17,

2 wherein the land is broadened for attachment of the accessory items.
